bioperformance, bioperformance fuel pills, gas pills

Article Body:

Since its founding, BioPerformance is now the fastest growing Network marketing Company in America and has paid out more commissions in its first 11 weeks than any other company in the same time period in the history of the Network Marketing Industry. Many who are standing at the sideline wondered if the product really works. The Proof Is In The Pudding.

On February 8, 2006, a lab test conducted by an ISO 9000 certified lab showed in their third evaluation a 25% increase in fuel yield and a decrease in the emissions of the following pollutants: 5.89% in CO, 11.86% in HC and 5.34% in NOx. BioPerformance, Inc. does not guarantee that the product works whatsoever and does not guarantee that you will earn any income whatsoever. BioPerformance, Inc. makes no income or product claims whatsoever. If you use our product and it works, then we believe you will want more. We have discovered that people not only need BioPerformance Fuel, but they want it--- and they want it NOW! Since the company started on December 8, 2005, total new sales and reorders are \$25,019,122.89. (MILLIONS).

Based on the Material Safety Data Sheet (MSDS) and review of The Code of Federal Regulations (including 29CFR1910 - OCCUPATIONAL SAFETY AND HEALTH STANDARDS and 49CFR - TRANSPORTATION), there are no dangers associated with the handling, storage, or transportation of this product. It is an extremely safe product in all aspects of handling and use. The pills are: non toxic, non flammable at room temperature, not water soluble and do not cause skin nor respiratory system irritation. It is a biodegradable enzymatic catalyzer made of an organic chemical formula, mainly an enzyme. It remains stable and active in a mixture of

hydrocarbonic and aromatic substances. The use of this product is safe for the environment as a result of reduced formation of carbon monoxide, corrosive acids, and other reactive compounds found in current combustion engine emissions."
