Article Body:

Kingsrealm Consulting Group has announced the release of their annual best-of-the-best web hosting providers - a business guide for small and mid-size companies. This free report outlines the top choices for a wide range of categories including low cost, high powered, and customer support.

Say's Kingsrealm CEO "We have found over the years that choosing a hosting provider can be a minefield of uncertainty for most companies. Even the best made plans for web hosting can go bad and leave a company scrambling for a quick solution to a hosting nightmare. This annual report serves as a guide to help companies who need to find a hosting provider make that decision a good one."

The guide is broken down into useful categories tailored to every business. Whether your web hosting needs are traditional or extraordinary there is a selection that will provide you the maximum power and flexibility for your needs at far lower cost than you might have imagined.

Having vetted and time tested these companies on over 500 projects we have kept the best and scrapped the rest so you don't need to deal with the junk. We have created a truly useful resource to keep your business safe and productive.

The report "The best Hosting Providers - A Business Guide" is available from the company as a free .pdf download.
