**Article Body:**

Myspace defines anything and everything a person desires to convey to his friends and communities online. Therefore, the Myspace background should be very attractive and visually appealing. There will be hundreds of visitors to the Myspace page each day depending on the content carried in the page. One way of attracting visitors and gaining more hits to the Myspace web page is to ensure that there are attractive features on the site. The site can be improved by adding a lot of colors and distinctive features identities. One of the most popular formats adopted these days is to improve the background of the Myspace web page. It is preferred by most of the Myspace owners and is often depicted in a very colorful format.

The web page is decked up with colors and themes and backgrounds that add value to the Myspace member's profile. The background should depict the attitude and the choice of the Myspace member. It can be achieved by doing many adjustments to the Myspace page. The web page can be adjusted by adopting some tools on the Myspace page. The tools are available on the Internet. The major among them is the background adjustments, which should be carried out by using the tools. The background adjustments have to be carried in accordance with the web page guidelines and rules. The Myspace background and themes are widely available on the Internet for use. Check them using the search and engines and download them. The background is available in two formats. They are paid backgrounds and free backgrounds. The paid backgrounds have a rich background and a number of features. The free backgrounds are also attractive and brightly colored, but have limited options.

The free background of the Myspace page comes in all shapes and sizes. They can be installed as a web page as whole or installed in the form of tiled. They can

also be used in multiple formats. Check the Internet site offering the Myspace backgrounds. The backgrounds come in all colors of nature, the natural colors and various shades that go well with the web page of the Myspace. There are artificial and synthetic colors that can be added to the web page. Visitors to the site will be provided with a set of tools using which the colors can be decided. The color mix choice will be given to the users. They can mix the colors of their choice that go well with the web page of the Myspace. The colors can be mixed using the tools provided. The next resultant colors are thrown up on the web page. Click on the particular color that goes well with your preference. Then, bring it on to the Myspace page by dragging it using the tools provided.

Take care to ensure that the layout is not spoilt while developing the background. There should be adequate space to highlight the features and programs hosted on the background by the account holder. The features should be in the form of icons on the background to provide the desired result. The colors of the background and the icons should not be contrasting.
