Dear Fellow Marketer,

t seems like everyday I read posts in marketing forums about how hard it is to
make money with AdSense. Now - I don't want to sound like a grouch here... but
to be honest with you, I've started to develop a little pet peeve towards posts
like this.

It's easy for me to say this now... But if I were able to turn back time to several months ago, then I'd see myself as one of the skeptical ones too. Believe it or not, I thought it was a complete waste of my time to mess with AdSense and niche sites. Heck, it was eating away at my entire day.

Like most of the "AdSense forum bashers", I just wasn't doing it right. I was throwing all of my efforts into manually creating niche sites. It wasn't long until I learned that if I was going to create multiple niche sites to bring in AdSense revenue and other sources of cash, I was going to have to change my strategies.

And just like any other business endeavor, I knew I should continue to do what worked. "Repeat what works," I kept telling myself. Well - I finally figured out what worked!

But the bad news was that I was still doing it all manually. It was taking me days and days to repeat the process of "what worked".

Trying to create site after site was getting a little ridiculous when I'd spend over a week creating just one site.

I knew that I could hang with a lot of the 'beginners' in the marketing crowd by doing things manually. But if I was going to jump one step ahead of them, I needed to change something soon.

And you know what? Now, I'm several steps ahead. And YOU can be too!

When I hear forum gossip about niche AdSense website creation being difficult and time consuming, I just get a annoyed because I know it's NOT true!

So that's why I've decided to just give away my custom built, niche AdSense website creation software for FREE... To prove those nay-sayers wrong!

Try to imagine how much progress you could attain if you could automate this entire niche-building process. Yes, I'm talking about everything... from adding assorted types of quality, fresh content to including multiple streams of income on your websites. All of this with an automatic switch.

The Truth Of The Matter Is - "If you're like I was, wasting your time on the things in your business that could be automated, your competition will quickly jump to the head of the pack while you sit back and let your lack of progress melt your business away!"

It's Not Your Fault Though Because...

There's an awful lot of people out there who don't want you to know about this - so that's why I'm here to protect YOU, my fellow marketer.
