## Article Body:

Myspace has become the largest networking site on the Internet. Its popularity is growing every day, and there are many users who are signing up every day. Layouts are the most important part of the site as it is what presents the profile to the users. Many visitors will be impressed with the profile and then make friends.

Since the site offers many opportunities with the features, there will be a lot of people flocking to the site. To match the number of users, there are many layouts that are being designed. Many designers post the layouts on the Internet, and they will offer the designs for free. Any user may pick one of these designs and apply it to their profiles.

The versatility of the features, and the number of users are a reason for the layouts to be popular. People want to experiment with them, as they will be of various themes. They can pick any kind of theme that they want, and they may just apply the codes to the site home page. Once this is done it will automatically be updated.

These Myspace layouts are also so popular because one can create their own designs. Since everyone will have different choices, they will be allowed to create a good theme for themselves. It allows a user to enhance his profile in a very big way. The different uses of the layouts will attract more users to the profile.

Myspace layouts are also so popular because they are available for free, and they are available on many sites. It is very easy to find good layouts too, as search engines will be of use. Users may also use suggestions from various sites, and they can be followed for the best results. There will be layouts to cater to all the needs of the people.

The layouts will not be monotonous but of various categories, and there will be everything right from films to music. It is up to the user to pick what he wants, and that is what makes the layouts so popular. With other networking sites, there will be no layouts to choose from. The layout designers will not leave any theme untouched.

As much as possible, they will give the user what he needs. Most users are happy with the choices that are offered with the layouts, but there are some others who may want to make their own designs because they may have a very specific profile presentation to make. Layouts are what will speak about the profile, so many users will take time to select this and customize their profiles.

Myspace layouts are becoming more popular by the day. Since there are many users, there is the need for the designers to keep updating almost every day. There is also no end to the creativity offered with the layouts.
