Are you looking for a digital photo printer? One of the best ones you could purchase is Kodak digital photo printer. Kodak is a well known name in the photo industry, some would joke that it is "too known". In the following lines I will describe some superb Kodak digital photo printers which really make the money.

Kodak Professional 1400 Digital Photo Printer

The Kodak professional 1400 Digital Photo Printer has a lower price than any other similar product in the field. It is a very tempting offer for small business that work in the domain or for professional photographers that need a low volume of good quality photos to present to clients. This printer is ideal for low volume quality printing.

The lower acquisition cost of this Kodak digital photo printer is caused by the fact that it is a thermal printer and even if it does make the money you spend on it you can't compare it with a professional 8500. It is ideal for small desktop applications that usually characterize small businesses in the photo industry.

Kodak digital photo printer 9810 is a very good; I can even say a beauty in its

field of activity. This Kodak digital photo printer can get you high speed, high quality and all this in just a few seconds. This means you can produce better quality products at a faster rate and at a lower price, what could sound better?

This Kodak digital photo printer produces 8x10 - inch print in just 45 seconds, and doesn't need post processing for picture stability. Here are some technical characteristics: prints which are borderless 8x10-inch are made just in 45 seconds or less depending of other characteristics too.

The fact that you produce fast quality pictures at a low price will assure your success on the market and customers will come back again and again. Versatility is another good thing that characterizes this Kodak digital photo printer; it can stay on a work floor as in a studio lab. Its durability has been seriously tested and convinced some to say that this water resistant printer is for a lifetime.

Kodak digital photo printer 6850

This Kodak digital photo printer is a money-maker, it can produce durable quality prints in seconds, prints that are guaranteed to resist to water and last more than you would want. The Kodak Photo Printer 6850 can print on borderless photo paper of 6 x 8 inch size in no more than 8 seconds.
