As the music industry grows by leaps and bounds more and more people are buying software that will allow them to copy DVDs and CDs. This type of software makes it very convenient and easy to make a duplicate copy of your favorite disk. 1 Click DVD Copy is one of the more popular programs for this as it is extremely easy to use.

However you should know that copying DVDs and CDs is not legal in all countries. It is generally believed that you are entitled to make a backup copy of a DVD/CD that you own for your own personal use.

As more and more movies and music are being released on DVD, making sure you have a backup copy ensures your future use of any disk you purchase. Many previously released documentaries and films are now being released on DVD, which makes viewing and enjoying a much easier pastime. Many people like to make a duplicate copy after purchasing rare footage so they won't risk losing it.

There are many other things you can do with this type of software too. For example, DVD copy 1 Click software also offers a limited error correction feature which allows many scratched and damaged disks to be recovered. For example, if you have a DVD that won't play because it is scratched or damaged there is a very good possibility that through the use of software a copy could

be made that is not damaged. Some copy software programs also allow you to convert your VS moves to DVD, or to back up your video games.

Before making a purchase it is wise to try the program first and make sure it can do what you want it to, 1 Click DVD Copy free download trial is one way you could do this. By trying the program first you also ensure that the program is easy for you to use and that it is compatible with your computer.

These types of software are offered at varying prices by the different manufactures. The use of duplicating software is a wonderful and useful addition to your software collection. It is easy to protect your entertainment investment with the right software.
