Keywords:

Search Engine Marketing

Article Body:

Most books and software ever sold online have-in one form or another-something to do with Search Engine Optimization. Why is this such a sought after service? Because... getting a good spot on major search engines can be the difference between \$0 in profit per day versus \$500 to \$150,000 in profits per day (depending on the product you are promoting). Now there are many books and programs out there... and trust me, I've tried nearly all of them. Here are my personal recommendations:

#1 - The SEO Elite Software is by far the best of the best in software out there. It is a bit pricey to start off with, but it will literally save you thousands of dollars in promotions. The advantage you have is that you can create instant back-links to your site whenever you choose to, and on more sites than you could ever dream of. To have access to tools with a 1/4 of these abilities you would pay about \$239 a year somewhere else. In short... you get more than you pay for. I'd rate it 10/10

#2 - Search Engine Optimization is another great, great tool. The price is a fraction of what you would pay on the previous software, but you are also more limited as to what you can or cannot do with this system. Still a super program, but remember: You Get What You Pay For.

#3 - Links Master is a program different from the previous two in the sense that you get someone else to blast your text ads out onto hundreds of sites.

Problem? You have limited control over the kind of sites and the amount of sites linking to your site. Again... a great service, but it does tend to go hard on the wallet of those starting out.

Believe it or not-there is no secret to getting your site listed #1 on major search engines. You read that right! Search Engine Marketing is always spoken of as though it is hard to do. And gaining a #1 spot on Google, well, that is just plain impossible. If done right, YOU can prove all those assumptions wrong.

Using software #1 it is easy and fast as lightning to get top ranking on major search engines and, as previously stated, it takes very little effort on your part. Go to the site, read the testimonials-and if you are serious about getting that #1 spot... I trust you will purchase the software. The SEO software is to the online marketer today as a machine gun would have been to a warrior in medieval times: It literally blows all Search Engine Marketing competitors to pieces!

Search engines can be an effective method of driving highly targeted visitors to a web site. Our search engine marketing page provides access to the collective wisdom of all the top search engine marketing experts with regularly updated articles, links to resources, and announcements of new tools and services available to the search engine marketing industry.

Do you want your site to rank #1 on Google?

Then use the #1 Search Engine Marketing tool, which is currently being used by thousands of search engine marketers around the world. Gain YOUR #1 spot on Google, Yahoo, and MSN in record time!
