The Studies about Baby Boomers in the Internet

If you are enjoying how you live today in the United States, you should realize that the freedom you enjoy is the work of the past generation. Today, there is less discrimination and people are now fully enjoying their civil rights as a citizen of the United States. You should realize the fact that a particular generation is one of the major contributors in the society that you see today.

This generation is called the baby boomers generation. So, what is the baby boomers generation? First of all, baby boomers were people who were born between the years 1946 to 1964. This generation is called baby boomers generation because of the significant increase in birth rate during these years.

Baby boomers play a very distinct role in society today and are very politically active. This is because of the way they grew up. The baby boomers generation grew up in a world where the Vietnam War started and civil rights protests were active. It is important for you to remember that early baby boomers came of age during the times where civil rights, the Vietnam War and conscription were being protested.

You should also realize the fact that most baby boomers grew up in an era where the cold war started. Because of the political condition of their country where they grew up in, baby boomers are well aware of their civil rights and also about the different political situations and policies that the country is facing today. Besides, they were the ones who contributed in emphasizing more freedom and they also contributed in equality of all citizens of the United States. This is one of the reasons why the United States is experiencing less or no discrimination at work. Thanks to baby boomers, every American citizen will be able to have equal opportunity for employment regardless of race, creed, gender and age.

Baby boomers were also born in times where the American Military virtually dominated the world. For this reason, you will see that the baby boomers generation presidents, namely Bill Clinton and the incumbent President George W. Bush emphasized widely on civil rights and also in reforming and increasing funds for the US Military research and development.

You will also see that they also increased NASA funding because they were born in the era where space travel started.

In the internet, you will see that there are a lot of studies about baby

boomers. You will see their history and also the projected future.

In the internet, you will see news that concerns baby boomers, such as retirement and health benefits. The reason for the concern of the United States government is about the retirement and health benefits funding. Because of the significantly high population of baby boomers today, the government projects that it affects will slow down the economic growth of the United States. This is because funding will be concentrated on the retirement of baby boomers, especially now that baby boomers are starting to enter the retirement age.

Government and private sectors concerned are now working together to fund the retirement and health benefits of baby boomers. The Social Security and the Medicare are two of the sectors concerned in the retirement of the large population of baby boomers in the United States.

In fact, there were about 78 million births during the baby boomers era. Today, the baby boomers make up 22% of the total American population. With this kind of population, who wouldn't be concerned when most of the baby boomers retire?

The fact that the birth rate declined after the baby boomers era, it is a reality that workforce will decrease and retirees will increase. This means less income for the country and more expenses for the retirees. This is why the government and numerous private organizations are now taking the necessary steps to provide sufficient financial and health retirement benefits to baby boomers.

Always remember that these people helped contribute a lot in politics, academic, culture, and also in the industrial sector. They helped in making what the country is today. This is why it is just right that the government and private sectors concerned should repay them when they go into retirement.
