Article Body:

Hair care assumes increasing importance as men age. Hair fall, gradual lessening in hair regrowth, conditions like Androgenetic Alopecia etc, are noticed with advancing age, especially in the period between 18-35 years. The body's natural hair regeneration fails to keep up with the quantum of **hair loss**. As a result receding hairlines, widows peaks, bald patches are noticed more and more.

It is but natural to resort to hair regrow products and vitamins to **regrow hair**. The shop shelves stock a lot of products to address male hair loss. While some are available in topical solution form, some are available as pills. Many of these products available on prescription as well as over the counter come with their own side effects.

Hair loss is predominantly caused by Androgenetic Alopecia, a condition characterized by abnormal quantities of Dihydrotestosterone (DHT) in the scalp. 5-Alpha Reductase, a naturally produced enzyme in the body processes testosterone in to DHT. **DHT blockers** address this issue and help control hair loss due to DHT.

Vitamins to regrow hair and stimulate hair production and follicle regeneration are present in some hair regrowth products that combine them with DHT blockers.

For Example, Ingredients that perform these functions in a preferred hair

regrowth product Procerin include Saw Palmetto, Magnesium, Zinc Sulfate, Vitamin B-6, Pyroxidine 5mg, CJ-11 Factor, CJ-9 Factor, and a proprietary blend of Gotu Kola, Nettles, Pumpkin seed meal, Siberian Ginseng, Yohimbe, Muira Puma Root and Uva Ursi. DHT blockers, natural herbs and minerals and vitamins are the main ingredients here.

Procerin is an all-natural product with no side effects and is available in both pill and solution form. It can be applied daily and starts showing results within two months from application, in cases within weeks.

Hair loss could be owing to many reasons ranging from genetic, dietary, medical and lifestyles. Vitamins that regrow hair are most effective when the body is still in the phase of producing hair/regenerating hair. Under such a circumstance, these vitamins and supplements help accelerate the process and also block the production of those enzymes eventually causing hair loss and male pattern baldness.
