

**Title:**

How Not to Lose 10000 Dollars in the Casinos

**Word Count:**

595

**Summary:**

I have recently been having some bad luck in the casinos, and this article is intended to help you avoid making the same mistakes I have made.

**Keywords:**

casino, gambling, poker, entertainment and leisure, sports, recreation

**Article Body:**

For the last several years one Saturday of each month some friends and I would get in the car and drive to Atlantic City for a night of gambling, and it has always been one of the best days of the month.

We have never really been big gamblers we usually just stayed with the slots or the roulette table, until six months ago when someone decided we should learn to play poker because that's where you can win lots of money fast.

So we all started playing poker in a weekly Friday night game together till we were good enough to play in the casinos. For practice I would play [Online Poker](http://www.online-casinos-789.com/about-online-poker.html) in some free multiplayer poker rooms and eventually I felt confident enough to join an online casino poker room for real money.

At first I was losing hand after hand but the more hands I played the better of an understanding I was getting for the game, and every night I started making less and less mistakes and I actually started to win a few hands. After about 2 or 3 months of this we decided it was time and we all drove to the casino to play some Poker.

We did ok for first timers, no one got rich but no one came home broke either. We decided that instead of our monthly trips we should start going every Saturday, and soon we would be leaving every Friday after work and coming back late Sunday night

Last month we decided to join this small tournament, the buy inn was only a few

hundred each and the prize was 10,000 dollars, so we all decided to go for it and to try to start making real money playing poker, and in the end it paid off, I am still not sure how but I won the poker tournament and the 10,000 dollars grand prize.

Before the tournament we had all agreed that if one of us won it we would go out and have a big party with the money, but I had a much better idea

I decided that I could turn this money into a much larger amount and since it was easy to win the first time it should be easy to do it again.

Now from my personal experience I know that the Roulette table is a great way to double your money fast, there were many nights id have 20 dollars in my poker before leaving the casino and I would manage to double it on one spin of the roulette wheel, and now I had ten thousand dollars and could walk away with twenty thousand in just minutes.

So against the advice of all my friends I looked for a roulette table where the same color had won three times in a row. Once I finally found a roulette table that had come up red 3 times in a row it I place all my winnings on black and what luck it came out red again and I nearly passed out on the casino floor.

Ever since that night I have not won anything I have played. The best piece of advice I can give anyone out there is to not let winning go to your head. If you are up in the casino, go home and enjoy the money. It is important to remember that gambling in a casino or an online casino is supposed to be fun and relaxing and if it is not go read a book or something.
