Article Body:

What is your goal? To earn money quickly, get additional income without work. HYIP market can realizes your dreams or makes you bankrupt. Where is limit? Listen to me and you will know how to be rich.

As successful HYIP investor you should know golden rules of sure investing. These rules are very significant and I want you to know them at your finger tips before you actually start your investing way.

Think Long-Term: Never ever think or plan to get rich within a short period of time. It is not reality. Usually good HYIP will never pay quite your principal and interest in less than 6 months.

Do not Quit: Winners do not quit and quitters do not win. It is a law of our life. The next step you take could be the winning step but if you quit, you'll never know how much you are loosing. Just keep investing and learning better ways to better your situation in life.

Be Prepared to Loose: In everything you do in life there are always times when losses occur. Life is all about ups and downs. Use losses or failures as a stepping stone towards greater success and also as an experience to make better investment plans, ameliorate on your strategies.

Diversify: Never put all your eggs into one basket. This is very important rule in HYIP investing. Invest in more than 5-7 programs to create multiple streams of investment income for yourself.

Research and research again: Always conduct your own research too. Always keep

your ears on the ground, join HYIP forums, read the FAQs and Terms, read emails sent by the programs you join, check monitoring sites as theHYIPs.net and write their support if there are issues you are not clear on in their terms or FAQs. Ping their domain to define their IP addresses and use an IP search tool or software to determine their location. Do not forget to do a whois search to define if what the programs say in their "About Us" is the same as it is in the search. When you get this information, compare it with what they say about themselves. Also, NEVER sign up a program that is hosted on a free hosting service or sites that use the same scripts. Never reply to any email asking for a confirmation of your username and password.

Protect yourself, your e-currency account(s) and your investments: This is another very important point to note. Avoid using your real names when dealing with programs you are not sure of except when it has to do with receiving your money via wire-transfer where you have to give your full details to the program to enable transfer of funds to your account. Also use different passwords for your e-currency accounts, your email address(es) and your investment programs. This will prevent fraudulent programs from trying to use the same password you used to join them to open your e-currency account(s). NOTE: If you are using e-gold, make sure you apply the security features as explained by e-gold to protect your account.

Avoid Greed: Do not let the human factor of greed take over your investment decisions. The scammers use the human factor of greed to lure you into investing your money with them. From my personal experience, I lost a lot of money due to the fact that I allowed the emotion of greed to do my investing for me. Scammers offer very high and unrealistic interest rates within a very short time. When this happens, you will know immediately that this will not last but the emotion of greed will always tell you to give it a try and this is where your downfall and failures will begin. These scammers might pay you the first time just to encourage you to invest more and when you do, they disappear.

Please take note of these important rules above and you will enjoy investing in HYIP investment programs.
