Imagine you are part of MySpace, and that you have plenty of friends. Besides having a lot of friends, there will also be new ones who might approach you. You can also meet a lot of acquaintances for various reasons. The profile will have to look interesting; else no one will be able to take any sort of interest in them. Imagine you have to look at the same settings for all profiles; it would be boring of course.

This is where the MySpace layouts will come into the picture. You will need layouts to customize the profiles to a great extent. You can do a great job with the profiles, as there will be a lot of layouts to choose from. This will be exciting to do, as there are so many unique ones to pick from. This is not only the idea of layouts; it is also to make the concept of the profiles different.

The layouts are needed for the profiles because the site is extremely popular. There are millions of users and if everyone has the same settings, it would become extremely boring. This is what the main purpose of the layouts is. You can also choose so many according to the themes that you have in mind, that there will be no shortage of layouts to choose from.

Since there are bound to be millions of visitors on the site, having different layouts will make a huge difference. You can easily talk about your interests and specific likes through this. All you need to do is pick one, which would suit your requirements. It could be about a film star, or it could be about some sport that you are passionate about.

Using specific MySpace layouts on the profiles will make you stand out from the crowd. This way, you will talk about yourself and you can also attract as many

friends as you can. This will keep your profile very exciting, as the main purpose of you using the site is to network. You should not think much about using the layouts, as there will be easy options.

Since there are so many themes and colors to choose from, there will be a lot of difference to the profile. You can also highlight a lot of things in the profile, by choosing the apt design as well as colors. This is what will make the profile unique. By being unique there will be so many things that you can do. You can create a number of networks based on the interests you are showcasing, using the help of layouts.

MySpace layouts are needed for profiles, as no two profiles need look the same. When each profile looks different, the community will begin to take a new looks altogether.
