

## The Newest BlackBerry Accessories

I don't know about you, but the first thing I do when I get a new cell phone is shop around for a great accessory or two to go with it. I can't stand having to use old equipment with a new phone, so whenever I change my handset, I change everything else as well. That's why I'm currently looking for the latest BlackBerry accessories for my brand-new Pearl 8100.

There are several BlackBerry accessories that I consider to be must-haves. For example, I definitely want a screen protector to help ward off scratches, so that's the first item on my list. I'm also looking for a nice leather case so my handset doesn't get damaged when it's not in use. I like keeping my phones as pristine as possible, because I can often sell them on eBay once I'm ready for a new model. Having the right BlackBerry accessories can make a world of difference in this department, so I don't mind spending a little bit extra for the good stuff.

Besides protecting the handset and screen, I'm also interested in buying products that will improve my new phone's performance. There are several great BlackBerry accessories designed to do just that, including Bluetooth headsets, car charger kits, and extra batteries.

I know it might seem like I'm going a tad too far with all of these BlackBerry accessories, but I rely on my phone so much that I can't imagine trying to make do with anything less. Plus, I've learned that I can get some outstanding deals on BlackBerry accessories online, so that helps lessen the impact on my wallet.

In fact, I was just checking out some of my favorite online stores today, and noticed that several of the BlackBerry accessories I want are currently on sale. Most of these web retailers already have the lowest prices around, so catching these products on sale is really just an added bonus. Then when you consider that I can get free shipping and won't have to pay sales tax on my order -- well, why wouldn't I shop online?

I've only had my Pearl 8100 for a few days, but I absolutely love it thus far. It's a sleek, powerful phone that has a bunch of cool features to help me stay organized. By buying a few good BlackBerry accessories, I can make my phone even better-suited to handle everything that I need it to do, while maintaining that fresh, out-of-the-box look. If you're doing this with your phones, you're making a big mistake!
