**Article Body:**

Most of the Internet users download screensavers. With many sites offering screensavers, how does one select the right screensavers? Downloading any screensaver can harm your computer, because most of websites wrap screensavers with spyware and adware. Both of these additions can considerably slow down your computer speed. Here are few tips about selecting the right screensaver.

**Select free** - Internet offers two varieties of screensavers. One that will cost you and the other that is free. Try free. You will get a large collection.

**Adware And Spyware** - Please read the instructions before downloading. If anywhere, they have written, that some adware will be added so that they can offer you free screensaver please get away. Those who add spyware, don't mention it. Prestigious websites avoid using spywares. Take care about these two additions and you will be safe.

**Designs** - The latest variety is Video Screensavers in Flash. These are beautiful screensaver, not high in weight and look lovely. The three dimensional Variety may weigh quite a lot and will take away lot of hard disk space and also take much more time downloading. Search for screensavers designed with themes of nature such as - Clouds, Birds, animals, Beaches, Oceans, rivers, waterfalls, Leaves etc. Andd you can view them any time you wish. During Holiday, download specific Holiday screensavers and double your enjoyment of holidays at no cost. Screensavers are a easy way to relax on the computer. Whenever you feel tired or tense, click one and watch it for some time. It will take your tiredness away.
