Boston has traditionally stood as the beacon of New England thought, culture and historical direction, and consequently has been the major force behind the independent progress of the United States of America. Boston's well preserved colonial architecture gracing the tree lined streets or the original oak seats of Fenway Park baseball stadium add insurmountable character to the historically indispensable city. With a nickname like "the Hub of the Universe," given by Oliver Wendell Holmes, it is impossible to justify not visiting Boston to discover the inspiring source of this pseudonym!

The Cradle of More than Liberty

Boston spearheaded the fight for freedom and independence from Britain during the Revolutionary War through both thought and action. The Old South Meeting House in the city center is where colonists gathered in 1773 before disguising themselves as Native Americans and dumping British tea into the harbor to protest taxation without representation. The Meeting House is open today for tours, concerts and historical reenactments. The site of the Boston Massacre and the Battle of Bunker Hill are also nearby. While in the city center, stop by the Paul Revere House, which is notable both for being the oldest building in Boston, built in 1680, and for being the home of the legendary patriot who warned colonists of British military action.

Further strengthening its earned title as the 'Cradle of Liberty,' Bostonians were firm supporters of abolition and the Underground Railroad. Boston has long remained on the progressive edge of education and social reform, boasting a plethora of elite universities and academies that include Harvard and MIT among their ranks. For an all around journey through time, travel to Boston and take

the 2.5 mile Freedom Trail, which starts in the excellent shopping area of Boston Common and continues through the city past 16 historical sites, terminating at the USS Constitution.
