Article Body:

Toyota is a name which is known as the name of quality. It does not compromise with its quality of work. Toyota Motor Corporation which is going to launch a new car model known as Toyota Venza in 2009 is working really hard on this manifestation of theirs. Toyota Venza, a car model to be launched in 2009 of Toyota Motor Corporations. It does not needs a label for defining Venza that's why whatever label you want to give it, you can give it. But the fact is that new Toyota Venza looks like a winner.

The 2009 Toyota Venza will be going on sale at the end of this year 2008. Toyota Motor Corporation calls it a "crossover sedan." This means a fusion of characteristics that lean more toward a car than a conventional sport-utility vehicle.

Unveiling at Detroit's North American International Auto show in January, Toyota Venza drew lots of attention of a large number of people. The vehicles that are currently available in the market, we can say that Toyota Venza reminds us of the Ford Edge crossover. Toyota Venza gives a look almost the same like Ford Edge crossover.

The 2009 Toyota Venza has five seats, just like the Camry, rather than seven like the Highlander. Its huge height, or the lip around the passenger doors bottom side is low; which makes it easy to lift feet inside. But the hip point for seated occupants is higher than the typical sedan's. Its seating is comfortable and easily just five passengers can travel in it. This car has a lot

of expectations of the market and company as well. It is going to be a great success of Toyota Motor Corporations.

It's was almost confirmed by the reporters in the Toyota Venza review that Venza has a fully independent rear suspension, but it can also be said that it's equipped with a space-saving solid axle of some sort. Toyota Motor Corporation has not yet said anything mostly journalists and reporters were unable to get the bottom line. A Toyota engineer said at the Detroit auto show that Toyota Venza is partially based on the Camry. He even said that the Toyota Camry although has an independent rear suspension, so it is not necessary that the Toyota Venza will also have an independent rear suspension.

Toyota Venza has got a number of reviews although the Toyota Motor Corporation has not yet launched it. It is a vehicle which is being awaited from a long time and has a number of expectations. This launch is going to be one of the best launches ever made by any automotive company. The Toyota Venza's rear glass has a nice, long rake, and its taillights wrap around the rear fenders onto the hatch. Its original wheels measure almost 19 inches in diameter, while 20-inch spoked alloys are optional. In short the Toyota Venza is one of the most amazing, reliable and interesting vehicles Toyota has launched in some time.

Toyota Venza reviews are that it is a car of great structure and interior. Rest of the decision will be taken by the buyer's of this car. In Toyota Venza review it was said that this car will be built at Toyota's assembly plant in Georgetown, Kentucky.
