ink cartridges, toner, printer ink

Article Body:

\$As a general rule, black ink cartridges are more affordable than color toner. When considering which to purchase, take a moment to think about how you will be using your printer. Will your printouts require color or will they work just as well in black & white? If the answer is 'yes,' you will save a considerable amount of money in purchasing the black ink cartridges.

\$If you are cost conscious and also have a great concern for the environment, purchasing recycled ink cartridges may be your best bet. Not only are these more affordable, but they are also better for the environment as are other recycled products. One of the best places for purchasing quality recycled ink cartridges is Viking Office Products and Staples.

\$When you purchase any type of ink cartridge, make sure that it is compatible with your printer. Many people are surprised to learn that ink cartridges are designed to be used with a specific model and manufacturer of printers, which should be clearly explained on the outside packaging. If you have trouble remembering the model number on your printer, simply write it down on a piece of paper and take it to the store with you. This will be the single most important information to have on hand when selecting ink cartridges for printers because without the right printer model number, you are not likely to get the right product.

\$Because ink cartridges are sometimes very expensive, it is often possible to find a real bargain on a printer/ink cartridge combo. A recent visit to a local retail store revealed a single ink cartridge for \$29.97. Just beside the ink cartridge selection were several boxed printers. Among them, a new printer and color ink cartridge combo, which was priced at just \$34.95. When you consider the difference of only \$5.00 and the fact that you could purchase a brand new printer and ink for almost the same price as a single ink cartridge, the better deal was obvious. In this scenario, you could simply resale your former printer on eBay and replace it with the new printer. This just goes to show that a little smart shopping can go a long way in terms of getting the best value for your dollar.

\$The majority of ink cartridges for printers carry a manufacturer's warranty guaranteeing your satisfaction. The only way to receive coverage as promised is to retain the original purchase receipt, ink cartridge packaging and warranty information. If your new ink cartridge should fail to work as promised, most manufacturer's will either replace the cartridge at no cost to you or refund the original purchase price in it's entirety.
