Article Body:

A credit card assures a seller that the person using it has a satisfactory credit rating and that the issuer will see to it that the seller receives payment for the merchandise delivered. A credit card is usually a card made of plastic issued to a user by a credit card system.

A credit card is different from a debit card in which the issuer lends the consumer money rather than having the money removed from an account.

A credit card system is a system of retail transaction settlement and credit system, established by a credit card provider.

There are numerous credit card providers all over the globe.

In credit card system a user is issued a credit card after an account has been approved by the credit provider, with which they will be able to make purchases from merchants accepting that credit card up to a pre-established credit limit.

The credit card user agrees to pay the card issuer for every single purchase by using a credit card. To accept credit card, a credit card user has to give his/her consent to pay specific amount of money. Originally the consent used to be by signing a receipt with a record of the card details and indicating the amount to be paid, but now many providers demand verbal authorizations via telephone and electronic authorization using the internet.

A cheap credit card is the most frequently searched keyword on internet today.

The credit card users all over the globe are always tracking the cheap credit card companies. A cheap credit card company provides card credit service in considerably cheap quotes.
