PSP wallpapers are cool. We all know it... But the question is where do you get PSP wallpapers at? I don't know about you but I hate having to search on google for wallpaper you want... then when you find it. It's to crappy, wrong format or whatever. Don't even get me started on stupid sites that offer all these "great deals" but don't even come close to delivering. I had all but given up until I found this site that actually delivered (imagine that). I know I'm not the only guy out there so I just had to get this out here. And I'm not going to waste your time with some long ass article that won't tell you anything. So I'm going to tell you where you can download, copy and transfer quality wallpapers to your PSP. I can tell you that PSP Wallpapers has all the highest quality pics of the most popular PSP wallpapers.
