Article Body:
First of all, a definition for music video codes is needed in order to know what this article is about : music video codes is a service which provides absolutely free HTML codes of music videos to embed on websites, community member's profiles (Hi5, Friendster and others) and also for blogs.

Music video codes is by far the most widely HTML tool used by MySpace members. Thanks to this tool, the success among the MySpace audience is huge, their popularity is rapidly growing. The success of music video codes combined with MySpace started in 2005 when people started using this tool to personalize their profiles, giving them a special look with music videos that say a word about their personality. Some of the websites that offer free music video codes grant the possibility to search lyrics for your favorite music videos which you can easily add to your website or personal profile on a website like Hi-5 or others.

Many of you may not know what MySpace is and also the reasons why this website has become so popular: MySpace is a social networking website which offers an exciting and interactive user submitted network of friends, groups, photos, blogs, personal profiles and of course, music and videos. Statistically speaking, MySpace is nowadays the world's sixth most popular website in any language which is an incredible thing if you take in consideration that in the present, there are about 10 billion websites on the Internet.

Websites which offer free music video codes are becoming very popular due to the fact that more and more people use these codes in order to change their profile on a site like MySpace for example, all this for free. Of course not all these

sites are the same, some are better than others. The best sites are the ones that offer a huge amount of video codes (some unique, in other words, video codes that you won't find on other websites).

A great feature that some websites offer is the possibility to create your own playlist, in other words, you can add your favorite videos one after another, become a real video jockey. You can customize this playlist, select the order in which the music videos will be played, the possibilities are endless with this powerful tool. This tool is easy to use so users won't have problems creating their own playlists which will surely give their personal profile a very special look.

Some websites which deal with music video codes offer the advantage of customizing your music video codes and lyrics. For example, when you click the " generate codes" button, most websites won't allow you to modify this code but there are some websites which have the option of modifying these codes in order to make them match better with the layout of the user's website.

All in all, the invention of music video codes gave the social networking websites a new look, greatly improving their traffic because it offers lots of possibilities like inserting music videos along with the lyrics, creating video playlists, all this for free. What more could you want?
