page of information, they would much rather look at a presentation and
understand the message. It has come to a point where images and videos are used
more to promote a product or service and this has extended from businesses to
our daily routine. We are all in such a hurry that we wave bye instead of saying
"goodbye", show the watch to point to the time and so on. It is a healthy habit
considering how we use our hands and motions to indicate what we are upto or
capable of. Imagine dancing a few steps to tell someone you are off to a dance
class? That would impress them to no end. The same applies when you are
interacting with others online through a forum. You can take the assistance of
MySpace Layouts to dress up your pages and convey messages to people who come
by. These MySpace Layouts will have boxes for content, and for your personal
information. There will also be provisions given in the MySpace Layouts for
putting up pictures and videos. One might even be able to use the MySpace
Layouts to put in a slideshow of their favorite pictures.

people to read the text, these extra frills from MySpace Layouts can remain.
