Internet fax service is the latest buzz. More and more businesses and individuals use it but most of them do not talk about it. Find out the answers to the crucial questions: Why you should begin using internet fax, how it is done and where you should get the internet fax service.

Why should you begin using internet fax service?

1. Internet faxing safes time – Think about all the time you or your secretary have been spending by standing near the fax machine waiting for faxes to arrive or trying desperately to send faxes. With internet fax services, sending and receiving faxes become much easier task that will require almost no time at all.

2. Internet fax services save money – Did you ever check how much money you spend on purchasing and maintaining your fax machine, fax papers and ink? Well, it can reach to a sum of 100 USD and more. With internet fax , you will have no expenses besides a small fee to the internet fax service.

How does the internet fax service work?

The internet fax enables you to send and receive faxes using your email. You get

a local or toll free number which will be your virtual fax number. You can add this fax number to your business card and give it to your business partners. Whenever a fax is sent to this number you receive an email right to your inbox with the fax as an attached file. The same way, you can send faxes as an attached file in an outgoing email.

Where should you get the internet fax service?

There are several internet fax service sources in the internet. The prices are pretty much the same but some offer better services and wide selections of programs so you could find the best one for your needs. The best way to start will be signing up to an internet fax service with a free trial.
