and of course do not forget your pictures with the bass fishes (have it scanned please)

And here's the easy way to do it:

1.   Carefully fold the piece of card in half.

2.   Use a very small amount of glue to fix the tissue paper inside the card as a lining.

3.   Trim a piece of colored paper with pinking shears, so that it measures 13cm x 8cm. Glue it to the front of the card, leaving an equal margin on each side.

4.   Cut a simple shape - a Christmas tree, a star, bells etc. - from an interesting paper of a toning or contrasting color. Glue the shape to the front of the card.

5.   When you are done with that, edit the picture that you have just scanned. You can use Paint Shop Pro for it.

There you have it, just use your creativity and you'll have a Bass fishing Christmas card to give to a bass fishing enthusiast.
